

DIY Basic Lotion Bars Recipe

Makes about 3 muffin-sized lotion bars, depending on the size of your mold.

- 1 cup Beeswax beads
 - 1 cup Cocoa Butter (you can also use Shea Butter)
 - 1 cup Coconut Oil
1. Add all ingredients to a small saucepan and slowly melt on low heat, stirring constantly.
 2. Once ingredients are completely melted, remove from heat and pour into molds.
 3. Bars will harden as they cool. Allow them to set at least 3-4 hours before removing from mold. Cool in the refrigerator for faster results.

If you want to experiment and make Oatmeal Lotion Bars or Lavender Lotion Bars, here is what I did:

Optional: Before pouring into molds, stir in half a cup of oatmeal flour (or more if desired).

Optional: Before pouring into molds, stir in 20-30 drops of Lavender essential oil.

The same recipe can be used for DIY Lip Balm.
